

# WORKERS' COMPENSATION

Morstan General Agency, a division of Hull & Company, writes a large volume of premium with key national and regional partners, which allows for improved leverage on program eligibility and pricing for you and your client. Our underwriters pride themselves on fast response times. In addition to writing Workers' Compensation for hundreds of classes nationwide, the Workers' Compensation Specialties division will frequently roll out additional classes of business with competitive markets. With our team's technical expertise, market relationships and creative problem solving skills, we can help place a broad array of classes and risks.
